DESIGN INNOVATION

EASY TO CONTROL

The Zipscreen difference

Zipscreen is Australian designed and manufactured and features the latest in technological innovation - ensuring the finest outdoor shade solution.

Your custom designed blinds can be made in widths up to 7 metres with a 5m drop, offering you an external solution to fit almost any area.

Slimline Design

Crafted from precision-extruded, engineering-grade aluminium, Zipscreen's 52mm side channels are built for durability and designed for a minimalist, modern finish.

Engineered for Endurance

The Zipscreen Bearing Idler is a high-performance component engineered for durability and long-term performance. Featuring dual stainless steel bearings, it delivers smooth, consistent movement and a strong, secure hold. Tested to exceed 10,000 cycles, it offers superior strength and longevity in any outdoor setting.

Hidden fabric retention

Concealed within the channels, z-LOCK™ securely fastens the fabric in position creating a strong, streamlined finish. With precision integration, the zip-guided system ensures zero gaps between the fabric and channel while ensuring an effortless operation.

Control Options

Spring

Easily move your Zipscreen shade by hand to the perfect height. For bigger or hard-to-reach shades, the pull stick allows you to pull and push the shade from fully open to closed in one effortless motion.

Crank

Simply rotate the crank handle to raise or lower your Zipscreen, no bending or stretching required. When not in use, the handle can be removed and stored away, or kept conveniently mounted using the support clip.

Motorised

Power your Zipscreen using an Automate hardwired or battery-powered motor. Enjoy convenient remote control, or go hands-free with the Automate Pulse PRO, enabling control via smartphone app or voice command for the ultimate smart home experience.
