Re: Revised Pack Quantities

Dear Valued Customer,

Rollease Acmeda is embarking on another continuous improvement project to make doing business with us even easier.

In the coming weeks you will be receiving several updates regarding revisions to the pack quantity offering of our window shading components.

Rollease Acmeda believes offering both a small and large pack quantity offering will help streamline your supply chain as well as bring added value to you, the customer, through an expanded offering of standardized quantities.

Please keep an eye on your inbox or feel free to speak with your sales representative for details as this project goes live.

Thank you for your business.

Peter Koenig
Director – Sales & Marketing
