

# Stainless Steel Chain Certification

Rollese Acmeda Stainless Steel chains are now provided with a certification, assuring customers they are guaranteed for use with Rollese Acmeda Chain Operated Systems. All mechanisms have been specifically designed to work with our ball chain offering.

Our Stainless Steel Ball Chain features an average tensile strength of 50kg.

We ensure, together with our system components and certified chains, we are providing the best possible operation for chain controlled blinds.

Each certified roll or bag of Stainless Steel chain can be identified as follows;
