

EASY SPRING WAND ASSEMBLY MANUAL

April 2018

CONTENTS

April 2018

This manual is to be read in conjunction with the Product Specifications manual

SECTION NO.	DESCRIPTION	PAGE NO.
SECTION 1 – SYSTEM DETAILS		1.1
	PART A – GENERAL SCHEMATIC	1.1
	PART B – SYSTEM OPTIONS	1.2
	PART C – BOM & DEDUCTIONS	1.3
	PART D – FABRIC PREPARATION	1.5
SECTION 2 – ASSEMBLY		2.1
	PART A – TUBE	2.1
	PART B – CONTROL	2.6
	PART C – DISASSEMBLY (IF REQUIRED)	2.9
	PART D – SYSTEM UPGRADES	2.10
	PART E – PRE-TENSION	2.11
	PART F – PREPARE & PACK ASSEMBLIES FOR TRANSPORTATION & INSTALLATION	2.15
SECTION 3 – TROUBLESHOOTING		3.16

DISCLAIMER

INTRODUCTION

This assembly manual has been produced by Rollease Acmeda to supply the necessary information for safe and correct assembly of this system.

DISCLAIMER

Rollease Acmeda has used reasonable care in preparing the information included in this document, but makes no representations or warranties as to the completeness or accuracy of the information. Information is supplied upon the condition that the persons receiving the information will make their own determination as to its suitability for their purposes prior to use. Rollease Acmeda assumes no liability whatsoever for any damages incurred by you resulting from errors in or omissions from the information included herein. Rollease Acmeda reserves the right to make changes without further notice to any products to improve reliability, function or design.

SECTION 1 – SYSTEM DETAILS

PART A – GENERAL SCHEMATIC

Rollease Acmeda Easy Spring Wand single roller system offers a high quality, aesthetically pleasing and technologically advanced Wand or Shade controlled solution. The Shade will open to your preferred top location in a smooth and controlled motion, with one simple touch.

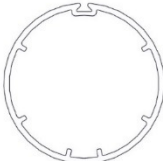

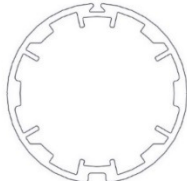

Note: This configuration is primarily shown throughout manuals; right hand control, back roll.
The side of the wand control determines what handing the Shade is.

		Fabric Drop	mm [inch]			D + 150mm [5.9"]	

*No Covers - If covers required add an extra 2mm [0.08"] to deduction off Width, ie. (W-29mm [1.14"]) = (W-(29mm [1.14"])+2mm [0.08"]) = W-34mm [1.34"]

*No Covers - If covers required add an extra 2mm [0.08"] to deduction

PART D – FABRIC PREPARATION

STEP 1 (IF USING SPLINE TO ATTACH FABRIC TO TUBE) – ATTACH AND SECURE SPLINE FOR TUBE

NOTE: Spline can be attached to fabric via welding, stapling or double-sided tape

STEP 2 – SECURE SPLINE FOR WEIGHT BAR USING STAPLES*

*Recommended when using one wrap on the spline

SECTION 2 – ASSEMBLY

PART A – TUBE

STEP 1 – SLIDE FABRIC INTO TUBE WHEN USING T-SPLINE

ALTERNATE ASSEMBLY: Fabric can be attached on the tube using double sided tape (min 2 full wraps of fabric on the tube)

STEP 2 – SLIDE BOTTOM RAIL ONTO FABRIC

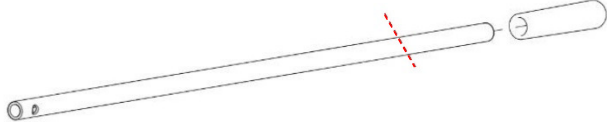

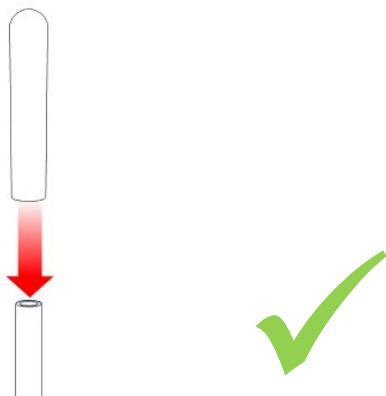

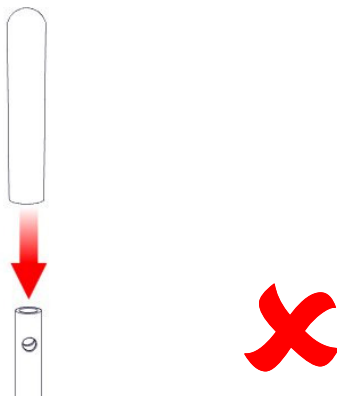

NOTE: Refer to “ATTACHING FABRIC WITH FLAT SPLINE TO BOTTOM RAIL” document for spline installation instructions

Optional: Insert Ballast (if additional weight is required to improve appearance of fabric)

STEP 3 – INSERT BOTTOM RAIL END CAPS

STEP 4A – ADJUST WAND LENGTH (OPTIONAL)	
<p>Standard Assembled length (with bottom cap attached) = 905mm +5/-2mm (35.6" +0.2/-0.08")</p> 	<p>For shorter Shade drops, the aluminium wand can be cut to the desired length before attaching the bottom cap.</p> <p>Note, ensure to cut wand at end without the cross drilled hole.</p>  <p>Remove all sharp edges and burrs before attaching bottom cap.</p>
STEP 4B – ATTACH BOTTOM CAP TO WAND	
VISUAL CHECK : ENSURE TO ASSEMBLE CAP ON CORRECT END (WITHOUT CROSS DRILL HOLE)	
	
ENSURE CAP IS FULLY ASSEMBLED ONTO SHAFT USING A Mallet (DO NOT DAMAGE OR DISTORT THE WAND OR CAP)	
	
VISUAL CHECK : ENSURE CAP IS FULLY ENAGED ON THE WAND (IT SHOULD NOT BE POSSIBLE TO REMOVE CAP BY HAND)	
 <p>NOTE : MAXIMUM LENGTH OF ASSEMBLED WAND SHOULD NOT BE GREATER THAN ALUMINIUM WAND LENGTH + 5MM</p>	

STEP 4C – ATTACH WAND TO CONTROL

Prepare to insert aluminium wand into the top cap.

The wand is easier to insert into the top cap if the inner plug is in the right place.

Before inserting the wand, align the holes in the wand so they are between the slots of the top cap.

Hold the top cap and push the wand firmly and fully into the cap.

Twist the wand while holding the top cap to ensure the snap features “click” into the holes in the wand.

Physical Check: While holding top cap, try to pull out the wand from the cap, to check the wand is engaged correctly. If the wand does not pull out, the assembly is OK.

If wand starts to pull out, stop and push the wand back into the top cap firmly and while holding the top cap, rotate the wand slightly in either direction to ensure the snap features engage. Repeat pull out check again to confirm engagement.

STEP 5 – LIMITER CONTROLS

Left Hand Side Limiter configuration (For Right hand control)

Right Hand Side Limiter configuration (For Left hand control)

STEP 6 – INSERT LIMITER INTO TUBE

PART B – CONTROL

NOTE – WHEN INSTALLING ITEMS ONTO THE BOOSTER HOLD HAND BEHIND OPPOSITE END TO SPRING, DO NOT HOLD THE SLEEVE OR TUBE ADAPTER

STEP 1 – ATTACH THE CONNECTOR AND DECELERATOR TO THE BOOSTER

For left hand control, clip the Connector onto the blue end of the Universal Booster

LEFT HAND CONTROL

For right hand control, clip the Connector onto the red end of the Universal Booster

RIGHT HAND CONTROL

Snap Decelerator to Booster

LEFT HAND CONTROL

RIGHT HAND CONTROL

STEP 2 - INSERT BOOSTER INTO TUBE

Right Hand Booster for Back Roll shown as example

NOTE: Booster must NOT be pre-tensioned

Insert Easy Spring Wand into connector

ADDING PRE-TENSIONS

Use Ratchet Socket to Pretension the Shade

LH INSTALL (BACKROLL) – CLOCKWISE
RH INSTALL (BACKROLL) – ANTI-CLOCKWISE

Refer to a separate Spring Pre-Tension Chart document to determine a minimum number of pre-turns required. At the end of this document there are pre-tension charts for a 420gsm (12.39oz/yd²) fabric for reference. (Right hand – back roll - control shown as example)

PRE-TENSION ADJUSTMENT – SHADE REMOVED

Hold the shade and use the Socket Ratchet to rotate the adjusting shaft (and wand control head) in an anti-clock wise direction enough to release the booster lock. The ratchet will spring back under the spring tension.

Hold the shade and Wand Control Head together. To add tension, rotate the Socket Ratchet for the number of turns desired in a counter clockwise. (Note, to remove tension allow the spring to unwind in the clockwise direction)

To re-lock the booster and shade, release the wand control and rotate the Socket Ratchet enough to re-engage the lock (approx. ¼ turn). The ratchet should spring back under the spring tension to the locked position.

PART C – DISASSEMBLY (IF REQUIRED)

WAND CONTROL / BOOSTER

Hold the Wand Control and remove it from the connector by overcoming the medium snap retention feature.

Note: A flat head screw driver can be used to separate the control from the connector/tube assembly if it is necessary to leave connector/booster assembly inside the tube.

To remove, rotate and twist off the connector from booster holding the black part of the booster (not the sleeve)

Left Hand Control

Right Hand Control

BOOSTER / DECELERATOR

Wedge off decelerator with a flat head screw driver by twisting the screw driver at the 2 clip points, slightly twist off one side and then the other to make it easier to remove. (The clipping points are located under the openings on the decelerator adaptor)

PART D – SYSTEM UPGRADES

Easy Spring Wand is compatible with CF90. To install the shade with a CF90, refer to the CF90 Manual.

Easy Spring Wand is also compatible with Cassette 100 and Cassette 120. To install the shade with Cassette 100 and Cassette 120, refer to Cassette 100 and Cassette 120 manual.

PART E – PRE-TENSION

SPRING PRE-TENSION CHARTS

1.5" (38mm) TUBE – D30 Medium Weight Bar (No Ballast)

PART F – PREPARE & PACK ASSEMBLIES FOR TRANSPORTATION & INSTALLATION

SHADE ASSEMBLY, BRACKET COVER X 2, MOUNTING BRACKET X 2, APPROPRIATE FASTENERS

Ensure all required items to complete installation are packed;

1. Shade Assembly
2. 2 x Bracket Cover
3. 2 x Mounting Bracket
4. Appropriate Fasteners

SECTION 3 – TROUBLESHOOTING

NO.	PROBLEM	CAUSE	SOLUTION
1	Erratic Behaviour Shade falls	Connector on wrong end	Remove and re-install on other end (See Section 2, Part C)
		No Pre-turns	Refer to chart for correct pre-turns
2	Shade will raise quickly	Wrong Decelerator	Remove and re-install correct Decelerator (See Section 2, Part B)
		Too many Pre-Turns	Remove Pre-Turns as per Sect 2, Part B (Pre-Tension Adjustment)
3	Operation of the wand does not lower or release Shade	Incorrect hand Control	Remove control and replace with correct hand control (See Section 2, Part C)
		Control is not fully engaged with Connector	Check deductions and/or bracket spacing are correct to specification
