MEET THE VEUE RANGE

This comprehensive range offers contemporary outdoor shading systems to suit a variety of applications while maintaining a consistent aesthetic and finish.

Veue has common components across the range and can be upgraded to our popular side-tension system, Zipscreen.

STRAIGHT DROP

The Veue Straight Drop offers a simplified minimal solution which is secured at the bottom using a clip or strap. Suitable for a variety of external shade applications - sliding windows and doorways, undercover areas or outdoor eateries.

WIRE GUIDE

A discreet cable guided solution, great for floor to ceiling applications. Featuring a universal bracket to fix the base of the wire guide to the floor, face or recess. Wireguide also utilises the patented Ultra-Lock for semi-automatic locking with spring and gear controls.

INNOVATIVE ALUMINIUM HEADBOX

High-quality square aluminum profile boasts a contemporary aesthetic, offering fully or semi-enclosed headbox and full or semi-fascia configurations.

COMMERCIAL USE

CHANNEL GUIDE

This solution features a slimline tension-free side guide, ideal for sheltered areas around the home. The Veue Channel Guide houses a fabric brush for smooth and quiet operation.

PIVOT ARM

This system is ideal for awning windows on first or second story levels. Veue Pivot Arm features a robust spring-loaded arm, maintaining constant fabric tension in all positions.

KEEP YOUR HOME COOL IN SUMMER AND WARM IN WINTER

Direct sun on your windows is the greatest source of unwanted heat in the home. Effective external shading can solve this problem by blocking up to 90% of that heat. By shading a building and creating an effective barrier between the sun and your window, you can create a cooler home environment and save energy. Shading glass is the best way to reduce unwanted heat gain, however, permanent shading structures that are inappropriately placed and designed can block winter sun, while extensive shading in summer can reduce pleasant daylight.

Adjustable shading systems can offer the best of both worlds, reducing heat build-up in summer, and enabling warm winter heat when the system is retracted.

SPECIFICATIONS

CONTROLS

There are a range of options for Veue Drop Awning controls, motorised or manual with a simple crank gear or spring.

SMART HOME

No matter where you are, you can accurately control your shades via the animated interface on your smartphone.
