NEW locking mechanism

## Introducing The New **Ultra-Lock.** Integrated. Intuitive. **Invisible.**

Designed exclusively for Zipscreen our latest locking mechanism utilises a heavy-duty latching pin, and hidden integration to secure and tension your shade; ensuring a reinforced, ultra-smooth fabric finish. New adaptive locking technology allows the shade position to be easily reset if simultaneous locking is interrupted by unexpected weather conditions or obstacles. The new unobtrusive design is durable, reliable and can be assembled off-site, to ensure installation is easier than ever. For supreme functionality, pair the new Ultra-Lock with our updated FT motor to experience automatic one-action lock and tensioning, thanks to our patented technology.
