EASY SPRING SERIES

Easy one-person installation, efficient top limit adjustment and Auto-rise technology, built into a modern design. Our Easy Spring Series sets the standard for child safe, chain-free roller shades. Both systems are also rigorously cycle tested up to 10,000 times and backed by our 5 year warranty.

Easy Spring Wand grants users seamless one-handed operation of the shade through either the contemporary designed and child safe, wand or by a light pull of the weight bar. Integrated with our advanced Auto-rise technology, the Easy Spring Wand innovatively self-rises smoothly with only a light touch of the weight bar or wand, stopping at an ideal top position.

Easy Spring Ultra is a completely chain-free, cord-free, child-safe solution. Unlike traditional spring boosted systems, the Easy Spring Ultra features our innovative Auto-rise technology and built-in decelerator, enabling a smooth, semi-automatic ascent at the touch of the weight bar.

DUAL SHADES REINVENTED

Aero™ reinvents the traditional dual roller shade system and introduces an innovative two shade solution, controlled with only one chain, thanks to its intricately designed, patented technology.

Minimal and unobtrusive, Aero neatly houses two shades in a slim 103mm x 135mm aluminium cassette, perfectly balancing light filtration and blockout, conveniently and compactly.

Aero is award-winning and child safe, boasting a contemporary design, Auto-rise technology that can be activated from both the chain or the weight bar, and easy one-touch limit setting.

SMALL TO EXTREME ROLLERS

The **S35 SMALL** roller shade system is a perfect solution for small sized applications. Designed to give the blind a more proportioned overall finish, it features our patented Easy-Lock™ technology, ensuring effortless installation. Additionally, the S35 has the option of spring assist booster technology and is available in a neat square-edge profile bracket design, for minimal light gaps. The S35 is also compatible with our CF75 cassette or 80mm FRS fascia system.

The popular and reliable **S40 and S45 MEDIUM** system universally meets the needs of most window furnishing requirements. Featuring our patented Easy-Lock™ for efficient and effortless installation this system offers four control solutions - crank gear, motorised, chain and spring. The established RB08 chain control is a popular, reliable solution, while our latest patented RB09 solution boasts an improved high polish finish, 10mm idle extension and snap-lock screwless assembly. The S40 and S45 systems are also compatible with our CF90 Cassette/ Fascia and FRS100 valance hardware, perfect for an enhanced aesthetic.

The **S60 LARGE** roller shade system is designed to withstand the weight of heavier shading applications. The robust design is available in chain, motorised or crank gear control options, as well as high performance spring boosters, available in three strengths. The S60 also has the option of 60mm and 80mm aluminium tube sizes and can lift shades of up to 25kgs while maintaining a strong pull force of less than 3kgs on chain-control systems. To further the aesthetics and functionality, optioning our FRS120 valance systems permit a premium finish to large roller shade solutions.

The **S100 EXTREME** roller shade system is designed for both internal and external, large, commercial applications. The S100 is robust, secure and performs effectively for motorised roller shade applications in excess of 7 meters wide.

CF SUITE AND FASCIA'S

Our **CF suite** offers a comprehensive collection of head box styles, controls and side channel options with improved performance, functionality and aesthetics. The contemporary round or square head box profiles are available as fascia or fully enclosed cassettes and are designed to house our S35, S40 & S45 roller systems. This modular system features adaptable edge side channels for optimum energy efficiency and light increased blackout.

The **FRS fascia** for roller blinds is available in three popular sizes - 80mm, 100mm and 120mm - ensuring compatibility with any application, whether small or large. All fascias offer a unique fabric attachment option to match any existing décor and are also compatible with our S35, S40, S45 and S60 roller shade systems.

CF90 BOTTOM UP

Perfect for ground floor home or office applications, our Bottom Up system is the innovative answer for a balance of natural light and perfect privacy.

Completely shaded from the bottom, Bottom Up lets the light in from the top, rather than blocking out the sun completely. Our system conveniently utilises CF90 cassette & S45 hardware to create an entirely reversed, yet exceptional experience, complete with our unique cord adjusting system and self-levelling hem bar.

NEW

ZIPSCREEN SKYLIGHT

The Zipscreen Skylight system offers the perfect solution for light block out in any horizontal or sloped windows. Using secure z-LOCK™ channels, the system achieves perfect tension of fabric in all directions keeping the fabric smooth and taut.

Conveniently motorised, the Zipscreen Skylight ensures ultimate energy efficiency, effectively controlling natural light and heat in both commercial and domestic applications.

Also available, the Wire Guide Skylight system offers a cost-effective solution for a range of application scenarios.

SWITCH PREVIEW ONLY

The award-winning Switch system enables easy and fast changing of fabric on the roller shade without needing to uninstall the tube of the shade. Switch allows users to customise their shades whenever they please, whether it be a change of heart, design trend, season or festivity.

The innovative system can be used for an array of both residential or commercial applications and effectively reduces the cost of repair and replacement of outdated shade fabric.
