

Dear valued customer,

As we continue to strive to provide a consolidated and relevant product offering, we find it necessary to rationalize our product variations to ensure we are meeting market demand. After careful consideration, we have decided to discontinue our entire line of rechargeable lithium-ion 12V motors and accessories. This will take effect when current stock is exhausted. Our 5V line of motors and accessories is a suitable replacement offering many distinct product and user improvements over the 12V line. Please see the attachment for a cross reference list.

A directory of all 12V motors and accessories is listed below.
