IMPROVEMENTS / CHANGES

FUNCTIONAL IMPROVEMENTS

- Tiltrod Support has been redesigned together with the updated Wand Control Unit with patent pending.
- It now holds a circular steel profile to connect to the magnet inside the Wand Control Unit.
- The Tiltrod Support is designed to run smoothly and securely within the VA08 Head Rail, with 3 tabs to snap off where required.
- Supplied with the correct sized screw to collide with tabs and stop tiltrod support in position during operation.
