AUTOMATE™
Li-ion Solar Charging Power Panel

AUTOMATE | Li-ion Solar charging power panel provides supplemental power to all Li-ion wirefree motors or rechargeable battery packs.

The monosilicon/crystal solar panel provides power in varied conditions including low light situations. Panels can also be wired in parallel to provide additional power for larger applications.

Users can refer to the AUTOMATE Solar Guide for direction related to regional solar conditions and expected performance.

FEATURES:

- Plug n’ play for all AUTOMATE Li-ion motors & rechargeable battery packs
- Sleek design allows for unobtrusive placement behind most headrails
- Parallel wiring options support large shades
- Monosilicon/crystal technology allow for up to 30% more efficiency than alternatives
- Low light harvesting technology supports power generation in varied conditions

KIT COMPONENTS

1. Solar Panel
2. Solar Panel Mounting Bracket
3. Double Sided Adhesive Tape x 2
4. Alcohol Wipe x 2
5. Self Tapping Screw & Drywall Anchor x 2
6. Installation Instructions
WARNING: Important safety instructions to be read before installation.
Incorrect installation can lead to serious injury and will void manufacturer’s liability and warranty.

CAUTION
• Do not expose to moisture or extreme temperatures.
• Do not allow children to play with this device.
• Use or modification outside the scope of this instruction manual will void warranty.
• Installation and programming to be performed by a suitably qualified installer.
• For use with Li-ion motors only.
• Do not cut power cables.
• Use only Rollease Acmeda hardware.
• Do not expose the Solar panel to water or install in humid or damp environments.
• Do not drill into motor body or Solar panel body.
• The routing of cable through walls shall be protected by isolating bushing or grommets.
• Ensure power cable and aerial is clear and protected from moving parts.
• If cable or power connector is damaged do not use.

Important safety instructions to be read prior to operation.
• It is important for the safety of persons to follow the enclosed instructions. Save these instructions for future reference.
• Persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge should not be allowed to use this product.
• Keep remote controls away from children.
• Frequently inspect for improper operation. Do not use if repair or adjustment is necessary.

Installation Scenarios:

- **Plug directly into Motor**
  - or use:
  - Solar Panel Y Cable
  - or
  - Cable Extender for parallel Solar Panels

**IMPORTANT!**
Fully charge the Motor or Battery Pack before beginning Solar Panel installation.

**Step 1.** Locate the optimal position for solar panel in window.
Ensure all components are available for installation scenario.

**IMPORTANT!**
Avoid covering of whole solar panel cell.
Ensure solar panel has adequate exposure to sunlight.
When selecting a position for solar panel, consider any external obstructions like trees, building, signs, etc. that may limit the amount of sun light reaching onto the solar panel.
Step 2. Installing Solar panel

**OPTION A. Attaching Mounting Bracket to Window Frame**

i. Install mounting bracket to wall/mounting point.

ii. Fix Solar panel to mounting bracket.

**OPTION B. Attaching Solar Panel via Adhesive Tape to a Window or surface**

i. Clean Solar panel front surface with alcohol wipe. 
   Allow surface to dry.

ii. Peel protective film off one side of adhesive tape and attach to one end of Solar panel.
   Press adhesive tape firmly onto Solar panel surface for 5 seconds to ensure good adhesion.
   Ensure that adhesive tape does NOT cover any portion of the Solar panel cells.
   Repeat previous steps for attaching adhesive tape to other end of Solar panel.

iii. Clean the window or surface with alcohol wipe.
    Allow surface to dry.
    Peel protective film off adhesive tapes.
    Press firmly onto fixing surface.
    Apply hand pressure for 5 seconds and check if firmly attached.

**IMPORTANT!**
Any partial or total covering of any solar panel cell will affect solar panel performance.

Step 3. Connect Solar Panel cable (female) connector to required (male) connector.

**IMPORTANT!**
Ensure any cables are kept clear of fabric at all times.
