

Balance with ease

Easy Spring Air

We're excited to introduce a game-changing solution for roller shades that's lightweight and cordless, enabling effortless raising and lowering to your desired position using the weight bar with a simple swift movement.

Our system features premium minimalist aesthetics, eliminating the need for chains or wand devices to control the shade. The bottom bar can even be fabric-wrapped to match the shade, creating a seamless look.

Operating our system is easy and child-friendly, ensuring a safe environment for your loved ones. In the unlikely event that the shade loses tension over time, you can easily adjust it at home without removing the system, ensuring it continues to work perfectly.

Easy Spring Air

Upgrade your Easy Spring Air system with our innovative limiter, which creates a setting to prevent the shade from opening past a certain point, ensuring it never operates higher than your desired setting.

For taller or hard-to-reach shades, we'll soon offer a pull stick option for even easier operation, along with a convenient handle attached to the bottom bar to keep the fabric clean and lasting longer.

The Easy Spring Air is available in Black and White to match lighter or darker themed interior décor, adding a touch of elegance to your space.
