

Making Extreme Size Shades for Commercial Applications with the S100 Extreme System

Question	Answer
May 8, 2020	
Which shade fabrics do you offer that come wide enough to make these shades 26' wide?	Our Textstyle X-Weave Exterior fabric line is available in 126" widths. Larger systems will require that the fabric panels be railroaded. This is how we attain the system widths discussed
What is the main difference between veue series and S100?	The S100 is designed and fabricated from larger more robust components to accommodated the extremely large dimensions. Vue is a smaller system for exterior drop and drop arm awning style shades
