

## Navigating Automateshades.com

Question	Answer
Aired July 14, 2020	
Is your drapery motor for ripplefolds & pleated drapes? Do you have your own track for ripplefold?	Our drapery motors can be used for either ripplefolds or pleated drapes. We do not provide our own track, that must be sourced elsewhere. We provide belt (100m rolls), drapery motors, and end track pulleys that are compatible with multiple track systems, such as; Somfy Glydea, BTX track, and more
Why can't I find the website with a google search?	Hi Tom...Try typing both words together: automateshades
where is that phone quick set up guide?	The link to download the pdf is: <a href="https://www.automateshades.com/resource/programming-guide-phone-version/">https://www.automateshades.com/resource/programming-guide-phone-version/</a>
Does adjusting the speed of a motor result in more or less noise or more or less power or more or less revolutions per charge cycle?	It can result in slightly less noise, but it will not effect the power usage of the motor or drain the battery quicker. At higher speeds, the motor doesn't run as long. It basically balances itself out and you will get consistent usage
The 'Cut In' remotes can be surface mounted into a low profile low voltage single gang j-box dBA for motors	Varies depending on motor, but average is ~44db
on the drapery ac motor is that controlable via toggle switch?	Not directly as it is not wired control. It operates over the air with the ARC technology. You could utilize a wall switch we offer or the relay module to make it operable with a toggle switch.
