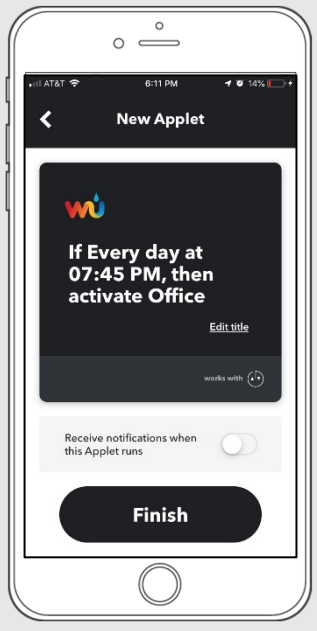
STEP 23



Select a scene already setup in pulse that will raise shades during sunrise. Select Create action

STEP 24

A summary of the trigger will appear. Select finish to finilise the Applet

Repeat these steps and create as may applets you require

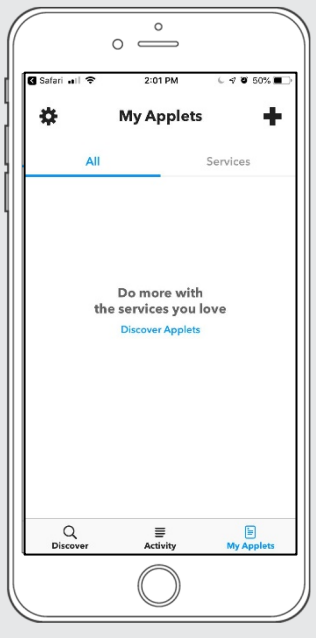
Example of Applet Triggers:

- **Close shades at Sunset**
- **Close shades if above x Degrees**
- **Open shade if UV index rises above X**

IFTTT brings all your IoT devices and apps together, here are some other commands that work with compatible apps and devices:

- **If I turn on light; close my shade**
- **If the temperature rises close my shades**
- **If there is strong wind warning close my awning**
- **If there is rain forecast close my awnings**

STEP 25

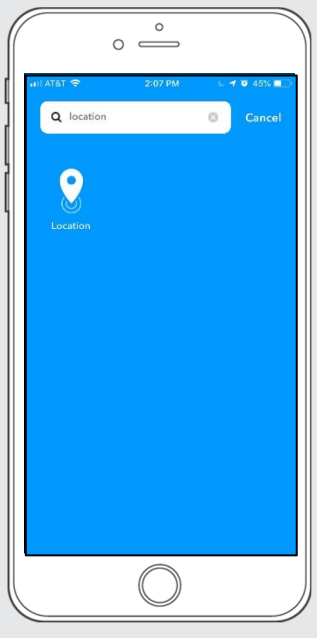


Select “my applets”
Select the + to create a new Applet

STEP 26

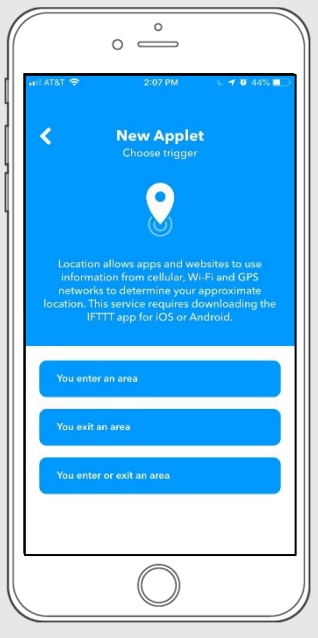
Select the Blue IF + to create the first trigger

STEP 27



Type “location” and select location service

STEP 28



Choose “you exit an area”
